

Product	Chem. Description	Features and Benefits
LUVODUR® ES 4860	Trimethylolpropane Complex Ester	Good thermal and oxidation stability. For high temperature chain oils. Improves rheology properties. Very low evaporation tendencies (Noack). V _{k40} : 100 mm ² /s.
LUVODUR® ES 4861	Trimethylolpropane Complex Ester	Good thermal and oxidation stability. Improves rheology properties. Soluble in mineral oils. Good lubricity. V _{k40} : 50 mm ² /s.
LUVODUR® ES 4862	Complex Ester	Good thermal, oxidative and hydrolytic stability. Rheology modifier in MWF concentrates and neat oils. Soluble in mineral oils. Good lubricifier. V _{k40} : 440 mm ² /s.
